

Name: \_\_\_\_\_

Start Date: \_\_\_\_\_

**Course Overview**

**Workbook Assignments:** The MathLinks textbook comes with a student workbook. You are to complete the workbook questions for each chapter. An answer key will be provided for you to mark your workbook. Your workbook grade is worth 20% of your final grade, this mark will be based on how much of the workbook you complete and if it has been graded by you.

**Chapter Quiz:** At the end of each chapter there is a small quiz, which is to be written in the classroom under supervision. You may bring in a cheat sheet on a single sided 8.5" by 11" piece of paper. You may have no help on your test. The average of all your quizzes is worth 35% of your final grade.

**Mental Math:** The calculator is a very useful tool, however, in this course you are to practice completing math questions without the use of a calculator. Do your best when completing assignments to use mental math. On your quiz you will be expected to complete part of it without a calculator.

**Projects:** The projects are a way for you to demonstrate what you have learned throughout the chapters. The projects are meant to challenge you to think outside the box and to be creative.

**Self-Assessment:** At the end of each chapter you are expected to complete a self-assessment. Self-assessments are not given a grade, they are assessed only on their completeness (C) or incompleteness (IC).
